

LOGAN M. PANUCAT

SOFTWARE DEVELOPER

Carcar City, Cebu | +63 991-551-9424 | logan.panucat2@gmail.com | portfolio-665c.vercel.app

EDUCATION

Bachelor of Science in Information Technology

June 2026

Cebu Technological University Naga Extension Campus | GWA: 1.73 (*Cum Laude*).

Relevant Coursework: Web Development, Database Management, Software Engineering, Mobile App Development, Object-Oriented Programming.

WORK EXPERIENCE

IT Intern & Software Developer (Academic Internship)

January 2026 – April 2026

Cebu Technological University Naga Extension Campus – Supply & Maintenance Department

- Developed an **Inventory Management System** using TanStack, Prisma ORM, and MySQL to track assets, manage borrowing, and automate report generation.
- Developed a **Library Management System** using TanStack, Prisma ORM, and MySQL to streamline book cataloging and tracking workflows for campus staff and students.

ACADEMIC PROJECTS

Supplyfy: Cross-platform Supply Management System (Capstone Project Leader)

.NET MAUI • Blazor • C# • MySQL • Entity Framework Core • Paymongo API

- Led a development team in architecting and deploying a cross-platform supply system for Dudz Hardware Store, integrating C#, .NET MAUI, Blazor, and Entity Framework Core.
- Programmed customer mobile ordering with integrated GCash payments via Paymongo API alongside desktop admin dashboards to manage real-time inventory, process sales transactions, and log business analytics.

Smart Waiting Shed (IoT Emergency Alert System)

ESP32 • C++ • Arduino Framework • Blynk Cloud

- Programmed ESP32 microcontrollers in C++ to interface with physical emergency alert triggers and MATRIX display timers.
- Configured real-time cloud data synchronization via Blynk for remote monitoring and automated alert notifications.

Ticket Support System

ASP.NET Web MVC • C# • SignalR • Entity Framework • Google reCAPTCHA v3 • TailwindCSS

- Engineered an advanced ticket support platform featuring real-time messaging using SignalR and responsive styling with TailwindCSS.
- Implemented secure authentication workflows utilizing Google Sign-In, Google reCAPTCHA v3 protection, and Entity Framework for efficient data management.

SKILLS

Languages: C#, Java, JavaScript, TypeScript, PHP, C++, C, Python.

Frontend: React (19), Next.js, TanStack (Start/Query), .NET MAUI, Blazor, Tailwind CSS, HTML5, CSS3, Unity.

Backend & APIs: Node.js, ASP.NET Web MVC, RESTful APIs, SignalR, Entity Framework (EF) Core, Prisma ORM, PHPMailer, Paymongo API.

Databases & Tools: MySQL, PostgreSQL (Neon DB), SQL Server, ESP32 Firmware, Blynk Cloud, Git, GitHub, Postman, Google reCAPTCHA v3, System & Network Configuration.
